

OTTOMAN ASSEMBLY INSTRUCTIONS

Thank you for purchasing our Ottoman base, please follow these simple assembly instructions

For safety reasons, we recommend that two people carry or move these goods

Safety Advice:

- Remove all polythene and protective packaging and dispose of carefully to avoid any injury to children
- Children should be made aware that this is not a toy and be supervised at all times when in the same room
- Take care when assembling the base- the Ottoman has a powerful sprung mechanism and, after assembly, should only be opened when the mattress is in place

STEP BY STEP

- 1) Locate and remove the inner package fixings which includes glides (feet) and screws
- 2) Position each base on its side, then attach the glides to each of the corner locator holes and, preferably using a mallet, tap home gently into the socket (you may need to clear the hole with a small screwdriver to allow for ease of fitting)
- 3) Carefully place both bed bases flat onto their castors/glides in close proximity to their final location (**Fig 1**) Position evenly alongside each other making sure that the rounded corners face outwards
- 4) Pierce the lid locator bolt section on each half (see sticker) with a small screw driver. Sit alongside the base unit and rest the lid on your shoulder, then attach the fixing bolt to each half and screw together finger tight only (**Fig 3**) (Take care not to over tighten, or you may strip the thread or damage the bolt)
- 5) Attach the 'u' clips to both edges securing the two bases together (**Fig 2**)
- 6) With the combined lid units fully open, use the bolts provided to attach the two lid risers together and gas struts (**Fig 3**) **Please ensure that nothing comes into direct contact with the gas powered struts which could adversely affect the mechanism**
- 7) Now ensure the base lid is fully closed before carefully placing your new mattress on top. This will ensure that the lid is permanently held down by the mattress weight (**Fig 4**)

Now it's time to fit your headboard

End Lift Ottoman Base- position where the bed is to be located in the room. At the head end you will find four headboard location stickers. Carefully pierce the holes and loosely attach the headboard bolts provided

Side lift Ottomans- you have the choice of either left or right handed opening

Slide your headboard struts (half headboards) onto the bolts then position at the required height before securing tightly

All that's left for you to do is make up your bed, and we recommend that you also fit a mattress protector

We hope you enjoy a great nights sleep for many years to come!
